

Kip Richards is a manufacturing engineer at INL. He has worked at INL since 2014 and within the manufacturing industry for over 25 years. Kip's manufacturing experience includes automotive, aerospace and welding fabrication. In 1993, he graduated with a bachelor's degree in welding engineering technology at Utah State University. Currently, Kip works with outside machine shops to manufacture INL-engineered components, which is crucial to the success of INL nuclear projects.
